

Mindfulness-based Cognitive Therapy

27 & 28 of June 2011

A workshop for trainers

With Prof. Mark Williams
Co-author van 'MBCT for depression'

Mindfulness-based cognitive therapy (MBCT) combines Jon Kabat-Zinn's Stress Reduction program with techniques from Cognitive Therapy in an eight week 'class' format. Following preliminary evidence for its efficacy in reducing relapse and recurrence in patients who have had three or more episodes of depression, interest has grown in applying the mindfulness approach to a variety of mental health problems across a range of different settings.

Topics

1

The 2 day will include will include:

- an overview of the MBCT curriculum with links between the classes & rationale for practices and their placement in the curriculum (including cognitive and behavioural elements)
- A short overview of some recent research (with clinical implications) on MBSR/MBCT
- Review of possible dangers & contraindications for Mindfulness
- Pitfalls in teaching & commitment to being a MBCT teacher
- How to steer a path between clarity of purpose for patient's attendance at class, motivation for doing home-based practice, on the one hand, and teaching non-striving, acceptance and 'wisdom' to participants on the other
- participants will have the opportunity to hear each others' experience with mindfulness teaching; to dialogue with others about how to deal with issues that arise from running the classes; to see how best to respond when difficulties arise.

Workshop leader

Mark Williams is Professor of Clinical Psychology and Wellcome Principal Research Fellow in the University of Oxford. He has been interested in cognitive models and treatment of depression and suicidal behaviour for many years, and has recently been collaborating with John Teasdale and Zindel Segal in developing Mindfulness-based Cognitive Therapy to prevent relapse and recurrence in major depression. His current work, with Melanie Fennell, is examining the application of MBCT to suicidal patients.

Practical information

The 2-day workshop is part of the professional training IAM or See True:

- Starts on Monday at 9.45 a.m. and finishes on Tuesday at 17.00.
- There is a brief evening program.
- There is a silent meditation in the early morning.

Please, arrive between 8.30 and 9.30 on Monday morning.

Early arrival? If you want to book an extra night, before or after the workshop, please contact Koningsteen.

Price, includes full board

Includes full board with delicious vegetarian meals and accommodation in a double room.
Everyone subscribes in right honour and conscience.
